

DAILY DISPOSABLE CONTACT LENSES GENERATE LESS WASTE THAN YOU THINK^{*}

Daily disposables vs. Reusable lenses

Wearing daily disposable lenses every day generates roughly 1 kg waste a year.^{1,2} To compare, reusable lenses (including care products) generates roughly 0.9 kg waste a year.² A close match when it comes to environmental impact.³

Comparing Contact Lens Waste to Common Household Items²

Insignificant Compared To The Amount Of Typical Household Waste⁴

The average American household produces 811 kg of waste a year.⁵ If worn every day for an entire year, the waste from daily disposable contact lenses accounts for only 0.1% of total household waste.
